Improving Air Quality in Senior Living utilizing Brondell Pro Sanitizing Air Purifier with AG+ Technology

ABOUT BRONDELL

Is anything more important than the air you breathe, the water you drink, and your personal hygiene? Brondell doesn't think so. The company develops innovative, award-winning products that significantly improve the health and wellness of your community. From bidets to air purifiers to water filters, Brondell has it all.

Brondell is committed to improving the spaces and routines your residents and caregivers engage with every day for a healthier, happier community. The team members at Brondell believe your caregivers and your residents deserve the best: the best water, the best air, and the best hygiene. And that's why they leverage the best science and tech available to create modern devices for better living.

ABOUT THE CLIENT

Operating 30 locations in Kansas, Medicalodges is a healthcare company providing a continuum of care for older adults and those living with developmental disabilities. Services include independent living, assisted living/residential care, skilled nursing, home care, rehabilitation, specialized care, outpatient therapies, and adult day care. Medicalodges' highly skilled staff of professionals is dedicated to helping residents achieve their highest possible level of physical, emotional, and social well-being. Medicalodges, Inc. was the first senior care company in the United States to be employee owned, and remains one of the largest employee-owned companies in the country.

“We like the flexibility and affordability of the Brondell purifiers because we can put them in a room with a patient, who is ill, or we can put them in the common areas such as dining rooms and hallways.”

- Kevin Christmas, Senior Regional Director of Construction and Facility Services at Medicalodges

THE CHALLENGE

In 2021, during the Covid19 Pandemic, the Medicalodges leadership team was exploring ways to help residents and families by reducing the spread of Covid19 and other airborne illnesses. With the social, emotional, and physical wellbeing of the residents and disabled seniors in their care, they began researching options for improving air quality and restoring socialization. They began researching multiple technologies and providers, then reached out to the Residential Assisted Living National Association (RALNA) for resources. Medicalodges was pleased to learn about Brondell air purifiers and scheduled a meeting with the Brondell team.

THE SOLUTION

The Brondell Senior Living Team presented information on the Brondell Pro Sanitizing Air Purifier with AG+ Technology via zoom, in a meeting that included 125 attendees representing RALNA (Residential Assisted Living National Association) members including the Medicalodges leadership team. Brondell presented information about their flagship air purifier, the Brondell Pro, the first air purifier with AG+ technology proven to eliminate SARS-CoV-2 aerosolized virus (the virus that causes COVID-19) within 15 minutes in independent lab tests done by MRI Global. The Medicalodges team was impressed by the independent test results of the Brondell Pro and its capabilities and decided to purchase the Brondell Pro for use in their 30 locations.

“Working with Brondell is extremely easy. We placed a bulk order, and they did a phenomenal job of delivering those for us. Our maintenance directors put the purifiers in place and started to utilize them day one.”

- Kevin Christmas, Senior Regional Director of Construction and Facility Services at Medicalodges

RESULTS

Brondell delivered over 300 Brondell Pro units distributed to 30 care facilities. Once installed, they conducted a mask test, filling a room with smoke to demonstrate the ability of the Brondell Pro to clean the air. The units performed exactly as they were designed to, mitigating the transmission of the airborne virus and allowing seniors and other residents the ability to socialize with fellow neighbors in communal areas and allowing visitors to see residents again.

Medicalodges accomplished its goal of providing peace of mind by using the Brondell units to help eliminate SARS-CoV-2 aerosolized virus (the virus that causes COVID-19) and H1N1 and H2N3 Influenza virus in their residential care communities. The Medicalodges team was very pleased with the seamless delivery, set-up, and the customer support they received. Most importantly, families and residents were able to engage with each other once more, providing social and emotional benefits.

To learn more about how the Brondell Pro can help eliminate pollen, smoke particulates, SARS-CoV-2 aerosolized virus (the virus that causes COVID-19), H1N1 and H2N3 and other viruses and bacteria during the cold and flu season, contact one of our knowledgeable senior living specialists at seniorliving@brondell.com
